Products and Services of the company

- Water Supply and Electromechanically Systems
- Center Pivot and Sprinkler Systems
- Drip System ,Green House , hose reel irrigation systems
- Design consultancy and installation of irrigation systems.
- Supply of farm equipment's and machinery.
- Solar Power System Supply and installation

A). Irrigation and Water supply technology

Center pivot and mechanical move irrigation systems has been at leading age of mechanized farming, being a proven method for conserving water, time, labor and chemicals while greatly increasing yield and productivity. Field-proven center pivot systems are steadily replacing, traditional flood irrigation and other types of sprinklers, and also subsurface drip irrigation (SDI) in some instances across the world. We have good knowledge of Center Pivot and full professional expertise for installation and after sales service of Mechanized-irrigation machinery (center pivots, travelling (hose reel) gun, boom

Drip irrigation system (cylindrical, on line, in line and flat drip systems) Sprinkler irrigation systems (in fixed and hand drug system that includes gun,impact and micro), etc Irrigation Control systems (Automatic, semi-automatic and manual systems)

Green House complete set of irrigation system

Complete Greenhouse solutions for horticultural and flower as per your requirements.

Supply and installation of different pipes for irrigation systems and water supply projects

Import and supply of all kinds of fitting (HDPE compression, electro fusion ,but fusion, thread, barbed and solvent of all kind, saddles, hydrants, quick couplings and fittings

B. Providing Turnkey Services

- Feasibility Study, design, specification and BOQ(Bill of quantity) preparation for modern irrigation and water supply systems
- Surveying and top map preparation for large scale irrigation & water supply projects
- Installation of of irrigation systems (drip, sprinkler, Pivots (, travelling guns & booms) and control systems)
- Installation of pipe supported furrow irrigation systems for different crops
- Providing maintenance and after sales services in modern irrigation and water supply systems with periodical supervision
- Commissioning and training in operation, maintenance & management of different irrigation methods

- Providing Complete package of training in irrigation.

- Providing consultancy and supervision service on irrigation and water supply systems
- Carrying out comprehensive works including study, design, surveying, specification preparation, supplying, and installation and after sales services.

- The company's head quarter is located in Addis Ababa-Ethiopia having branch office in different regions of the country. Currently the company has 18 total employees of permanent and contract.

- All the above capabilities make the leading local irrigation company in Ethiopia, that own complete system from study up to installation with many years of experience in design manufacturing, supply & undertaking turn key projects & very responsive to customer.

Vision

Your Partner for

Better Irrigation Solutions

Ethio-Rain
Irrigation Systems P.L.C

Tele:

09 10615757

Ethio Rain will become market leader in the modern irrigation and water supply technology development, being best partner for Irrigation and Water supply Solutions.

Mission

Ethio Rian Provides Powerful irrigation, Water Supply and Electro Mechanical technologies to the local market, offering best quality products and Services to enhance better way of life.

Our Values

Leadership - We inspire others and demonstrate courage to make a difference.
Integrity - We are open, honest and transparent.
Collaboration - We create more together than as individuals.
Accountability - We set high standards and deliver against them.
Respect for others - We foster an inclusive culture that values each other's views.
